

PRESS RELEASE

Pfeiffer Vacuum debuts new Internet presence

Asslar, Germany, September 30, 2010. Pfeiffer Vacuum has completely redesigned its Internet presence at www.pfeiffer-vacuum.com. The revised website features a straightforward layout that offers user-friendly operation and optimized functionalities.

One of the aspects that were improved was tab navigation in order to be able to directly access pages and minimize loading times. This means that users will be able to navigate more clearly, easily and faster between the individual areas of the site. It takes only a few clicks to find important information and dates. Newly integrated is a Feedback Manager that enables users to directly rate a page. To assure personal contact, the applicable points of contact will always be shown worldwide, along with their contact details.

The powerful search function with auto-completion feature simplifies the search for relevant content and automatically generates suggestions. The newly created Downloads department offers users a broad selection of technical and company information. Users will find extensive basic and background knowledge about vacuum and the products from Pfeiffer Vacuum in the Know How department. We look forward to welcoming you online.

Profile Pfeiffer Vacuum

Pfeiffer Vacuum is one of the world's leading manufacturers of components and systems for vacuum generation, measurement and analysis. Ever since the invention of the turbomolecular pump by Pfeiffer Vacuum, the company has stood for innovative solutions and high-technology products that are used in the analytical segment, in research and development, environmental technology, chemistry, semiconductor production and coating technology, as well as in the automotive industry and any number of further sectors. Founded in 1890, Pfeiffer Vacuum is today together with Trinos Vakuum-Systeme active throughout the world with a workforce of some 870 people as well as 14 subsidiaries and over 20 agencies. Further information is available at www.pfeiffer-vacuum.com.
